

DARYL C. LABIAL

COMPUTER ENGINEERING STUDENT | ON-THE-JOB TRAINING APPLICANT

✉ daryllabial1@gmail.com | ☎ +63 946 103 2379 | • Carrascal, Surigao del Sur, Philippines

PROFESSIONAL SUMMARY

Detail-oriented Computer Engineering student at North Eastern Mindanao State University with a solid foundation in software development, networking, embedded systems, and database management. Proficient in Python, C++, JavaScript, and microcontroller programming, with demonstrated ability to deliver full-stack web applications, IoT solutions, and autonomous hardware systems. Adept at analytical problem-solving, cross-functional team collaboration, and technical documentation. Eager to apply academic training and hands-on project experience to a professional environment through internship or on-the-job training.

EDUCATION

Bachelor of Science in Computer Engineering

2023 – Present

North Eastern Mindanao State University (NEMSU) – Cantilan Campus

Relevant Coursework: Data Structures & Algorithms, Computer Networking, Operating Systems, Embedded Systems, Software Development, Database Management, Computer Hardware Fundamentals, Electronics Fundamentals

TECHNICAL SKILLS

Programming: Python, C++, Arduino, SQL, HTML, CSS, JavaScript

Frameworks & Tools: Flask, Django, Android Studio, Git, GitHub

Databases: SQLite, MySQL, Database Design & Modeling

Networking: TCP/IP, Router & Switch Configuration, Troubleshooting

Hardware & Embedded: ESP32, Arduino, Computer Assembly, OS Administration

Professional: Analytical Thinking, Technical Writing, AI Ethics, Agile Teamwork

ACADEMIC PROJECTS

PawareHauz – E-Commerce Platform

Django · MySQL · HTML/CSS

- Architected a full-stack e-commerce application for electronics and hardware products, implementing user authentication, product catalog, and CRUD operations.
- Designed responsive UI components and integrated a relational database to manage inventory, orders, and customer data.

Autonomous Firefighter Robot

ESP32 · Arduino · C++

- Engineered an autonomous firefighting robot utilizing flame sensors, ultrasonic sensors, and obstacle-detection algorithms for real-time navigation.
- Integrated mobile control interface and automated fire-suppression mechanisms, achieving reliable autonomous operation.

ESP32 Mobile App Controller

Android Studio · ESP32 · Java

- Developed an Android application enabling wireless communication and remote control of ESP32-based IoT devices with real-time monitoring.

Water Billing Management System

Python · SQLite

- Built a database-driven billing solution that automated invoicing, customer record management, and financial reporting workflows.

Parking Lot Reservation System

Python · SQL

- Developed a reservation platform with booking workflows and database integration, improving space utilization and record tracking.

CAREER OBJECTIVE

Seeking an internship or on-the-job training opportunity in software development, IT support, network administration, systems administration, cybersecurity, embedded systems, or quality assurance where I can apply my technical competencies, contribute to organizational goals, and develop professional expertise within a dynamic technology-driven environment.
